# ADNAN MUHAMMED

*Full-Stack Developer | MERN & Next.js*
Trivandrum, Kerala, India | +91 9778769070 | adnan.shajahan786@gmail.com | Portfolio | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Full-Stack Developer with a 1.5-year internship background, skilled in building full-stack applications with MERN, Next.js, and modern web technologies. Dedicated to continuous upskilling and project development alongside other commitments, with recent hands-on experience deploying complete, production-ready web applications. Seeking a Full-Stack, MERN, or React Developer role.

## EXPERIENCE

**Independent Full-Stack Developer** | Nov 2024 – Present | Thiruvananthapuram, Kerala

- Focused on independent full-stack product development alongside freelance web projects.
- Architected and deployed complete applications covering frontend, backend, database integration, APIs, and cloud infrastructure.
- Developed custom frontend landing pages and UI solutions for local clients.

**MERN Stack Developer Intern** | Brototype | Jun 2023 – Nov 2024 | Thiruvananthapuram, Kerala (On-site)

- Completed 1.5 years of project-based MERN Stack training and practical development.
- Gained hands-on experience in building full-stack applications, REST APIs, authentication, and database design.

## TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, JWT & OAuth Authentication, RBAC, MVC & Clean Architecture
- **Real-time:** WebRTC, Socket.io, Supabase Realtime
- **Databases:** MongoDB (Atlas), PostgreSQL, Supabase, Firebase
- **Cloud & DevOps:** AWS (EC2, S3), Docker, Docker Compose, Nginx, PM2, GitHub Actions CI/CD, Vercel, Netlify

**Tools & Testing:** Git, GitHub, Postman, Node.js Test Runner (automated testing)

## PROJECTS

**ZyDocare Health: Telemedicine & Doctor Appointment Platform** | Full-Stack Developer

***Technologies:*** *Next.js, TypeScript, Node.js, Express, MongoDB, Socket.io, WebRTC, AWS (EC2/S3), Docker, CI/CD*

- Architected a full-stack telemedicine platform with WebRTC video consultations and Socket.io real-time chat, using Next.js (App Router), Redux Toolkit, and Node.js.
- Eliminated double-booking race conditions using atomic MongoDB transactions; implemented JWT (HttpOnly cookie) authentication with RBAC and idempotent Razorpay webhook and refund handling.
- Secured media uploads with AWS S3 presigned URLs; automated deployment to EC2 using Docker Compose, Nginx, and GitHub Actions CI/CD, backed by automated integration tests.

**Live:** carehealth.online | **Frontend:** github.com/Adnan-Muhammed/zydoc-frontend | **Backend:** github.com/Adnan-Muhammed/zydoc-backend

**LinguaChat: Real-Time Chat, Video Calling & AI English Learning Platform** | Full-Stack Developer

***Technologies:*** *Next.js (App Router), React 19, TypeScript, Tailwind CSS, Supabase, WebRTC, Google OAuth, Gemini API, Infisical*

- Built a real-time chat and peer-to-peer video calling platform using Supabase Realtime and WebRTC, featuring Google OAuth, user profiles, and friend request workflows.
- Integrated Google Gemini AI to construct an interactive English learning assistant offering instant translation, dynamic sentence construction, and real-time grammar checks.
- Configured Supabase PostgreSQL database architecture with Row Level Security (RLS) policies for user data isolation, and managed environment secrets securely using Infisical.
- **Live:** linguachat-omega.vercel.app | **GitHub:** github.com/AdnanMuhammed/linguachat

**E-Commerce Platform** | Full-Stack Developer

***Technologies:*** *Node.js, Express.js, MongoDB, Mongoose, EJS, Razorpay, Multer, PDFKit, Bootstrap*

- Developed a responsive, end-to-end e-commerce web application featuring user authentication, product catalog, cart, and wishlist workflows.
- Integrated Razorpay payment gateway along with Cash on Delivery (COD) and a custom in-app Wallet payment and refund management system.
- Built secure session-based authentication with Nodemailer OTP verification for registration, password recovery, and role-based access control (Admin vs User).
- Engineered comprehensive Admin dashboard modules for dynamic category management, stock tracking, coupon codes, and banner management with Multer image uploads.
- Implemented automated PDF invoice generation for customer orders using PDFKit.

- Optimized database performance using compound indexing and aggregation pipelines for analytics and sales reports, reducing query latency and avoiding collection scans.
